CABINETRY

Framed or Full-Access...

YOU DECIDE.

Design is always moving forward - and so are we.

For years, Evoke by R.D. Henry & Co. has been known for beautiful framed cabinetry featuring timeless design, proven construction, and dependable quality. Now, we're excited to introduce Evoke Full-Access, a modern cabinet solution that eliminates the face frame to offer a streamlined aesthetic and more storage.

This is not a departure from what we do—it's an expansion of what's possible. Both our Framed and Full-Access cabinetry lines are built on the same foundation: uncompromising craftsmanship, thoughtful engineering, and a commitment to lasting quality. From material selection to construction methods, every cabinet is held to the same rigorous expectations—regardless of style.

Welcome to a new level of design flexibility.

One Brand. Two Construction Styles.

Consistency is key

Built with the same quality standards and manufacturing precision - so you're choosing an aesthetic, not a different level of craftsmanship.

Seamless style integration

Shared door styles, finishes, materials, and hardware make it easy to mix styles within a home or project.

About our Full-Access Box

Less Frame. More Space.

With no face frames, no center stile and wider drawer boxes, full-access construction maximizes interior capacity.

You gain valuable, unobstructed access to your cabinet interior. Compared to a framed cabinet, **it can be as much as 10% more usable space**. And every little bit of extra space matters.

KEY FEATURES

- **More Usable Space**
Allow for better storage and smarter organization.
- **Full-Extension Drawers**
Improves visibility and convenience.
- **Soft-Close Standard**
Smooth, quiet operation on doors and drawers.
